Input field contains multiple lines. Each line is an individual input that is required to get to the respective test case if the user were to have just started the program. That is, the input field:

`login`
`ATM`
`logout`

would represent the inputs: `login` > (PRESS ENTER)> `ATM` > (PRESS ENTER) > `logout` > (PRESS ENTER)

It is also important to note that inputs are not case sensitive. Every input will be formatted to be lower case. The only exception would be inputs related to names, as names are case-sensitive.

login:

Requirement	Test No.	Test Name	Purpose	Input	Input Files	Output	Output Files
no other transactions before login	R1T1	idle logout	User cannot logout before logging in	`logout`	none	Error: You must login before you can logout. Please type login:	none
